Introduction

Modern Systems for Software Development

- Modern Systems for software development is a dedicated IT firm that specializes in enhancing business processes and increasing visibility for both internal employees and external customers, aligning with strategic organizational goals. Our expertise lies in continuous process improvement, fostering growth and development within organizations. We offer robust online and offline services, tackling challenges faced by internal and external stakeholders and devising innovative solutions to meet their objectives. With extensive experience across various software domains, we leverage universally-adopted frameworks to assist organizations globally, delivering tailored software solutions and comprehensive process analyses.

Visit Clinic

Visit Clinic

- Visit Clinic is an integrated medical ERP system designed for a wide range of users including doctors, pharmacists, laboratories, medical sales representatives, manufacturers, companies, and individual consumers. It serves as a unified platform to facilitate the provision of medical services. The website is user-friendly, boasting a plethora of functionalities to cater to various needs. Continuously enhanced by expert consultants, Visit Clinic is committed to exceeding user expectations with its robust features. Striving to be the preferred choice for numerous healthcare professionals, Visit Clinic offers outstanding services. Its platform is not only powerful and adaptable but also designed to be straightforward and efficient.

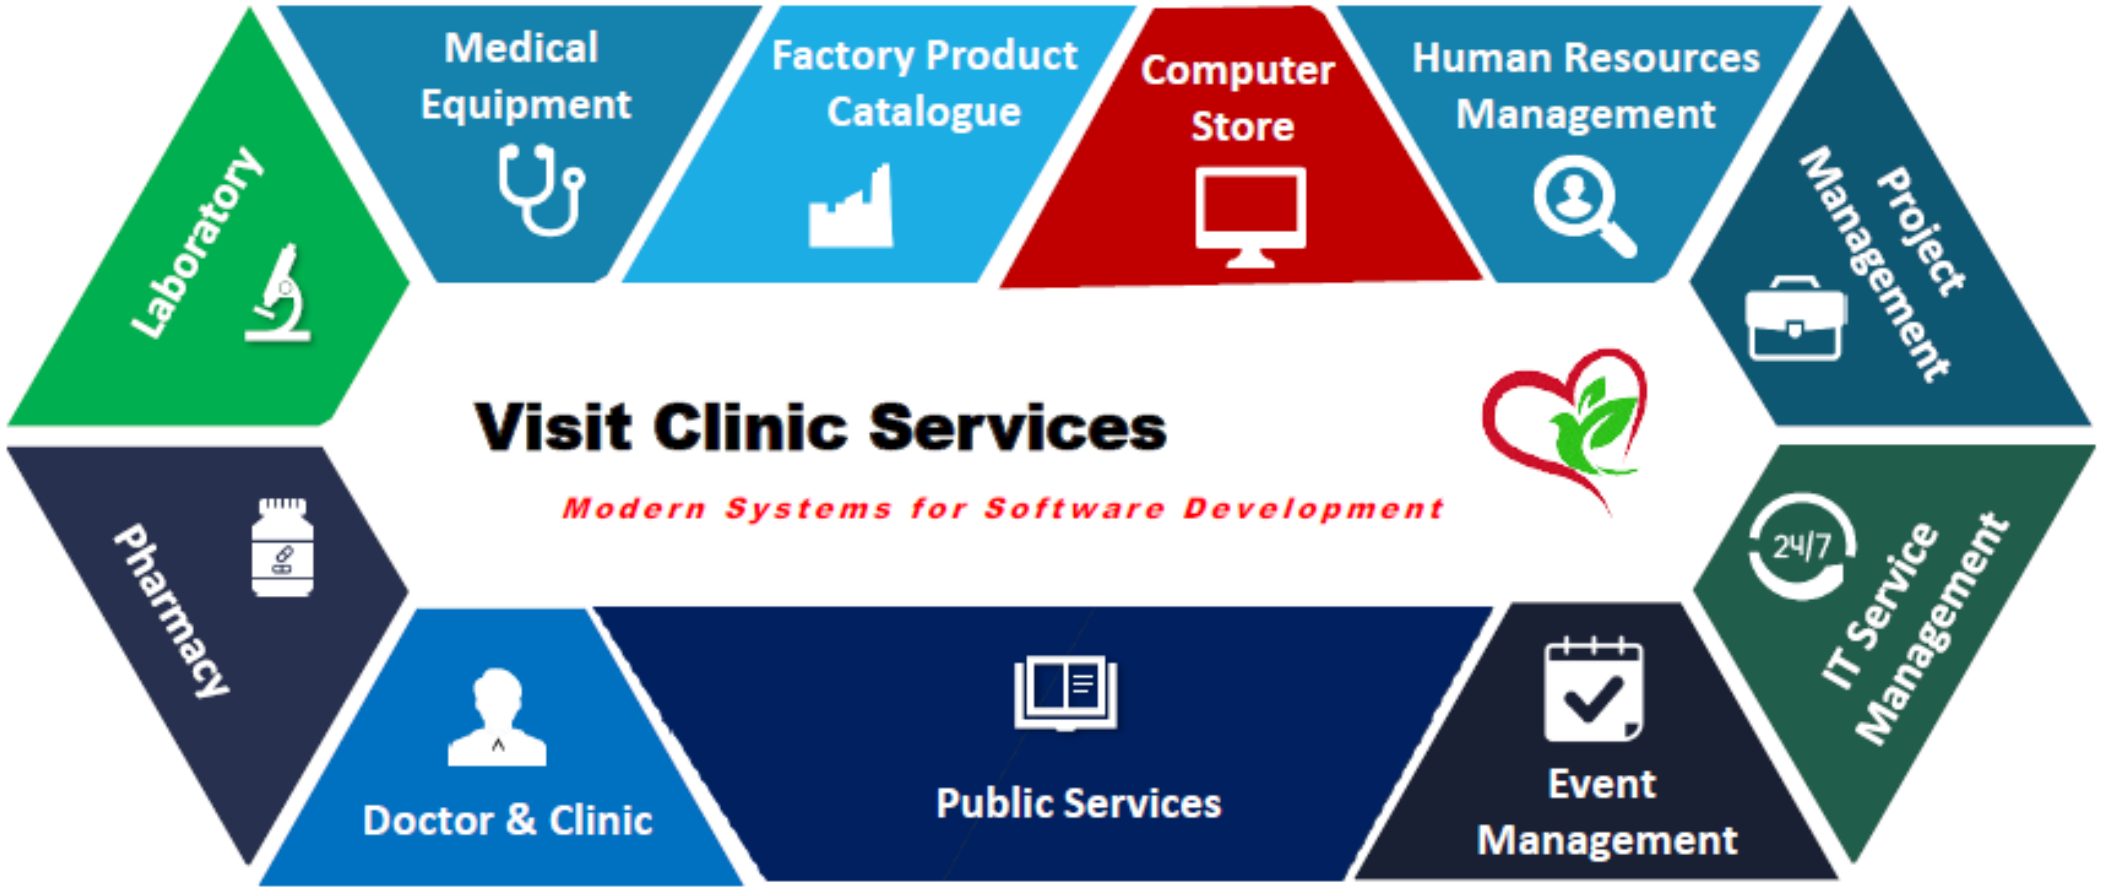
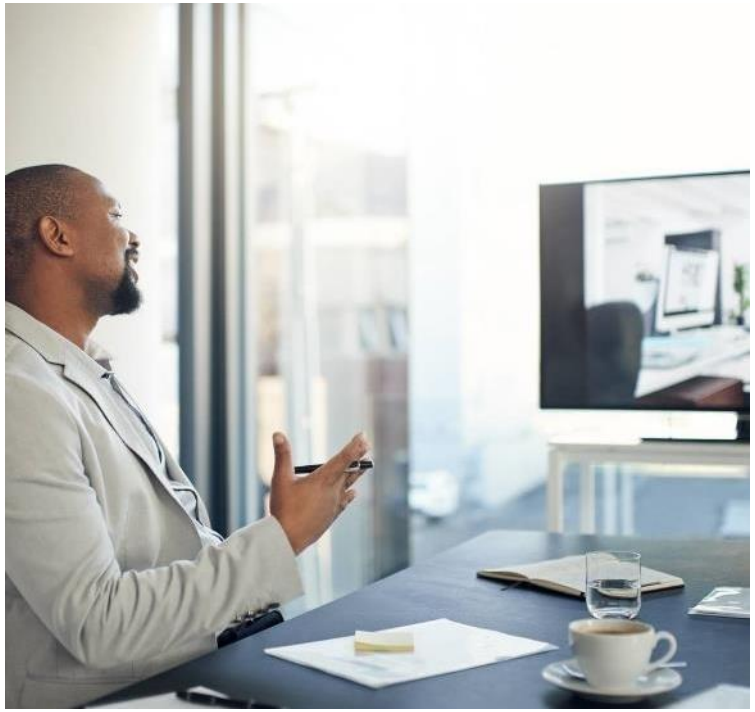
Visit Clinic Modules





Public Services

Our company offers a range of services, some of which are available to all users at no cost. Additionally, we provide premium services that require a monthly subscription.

Public Services

Public services, widely available online, facilitate collaboration among clients seeking appropriate medical services. These services are typically free, although some may be exclusive to users affiliated with certain companies. Regardless, users can access these services at no cost, depending on their account type. Subscribers have the added benefit of accessing both public and exclusive subscribed services, ensuring a comprehensive range of options.

Doctor & Clinic Services

The doctor and clinic section is designed to assist healthcare professionals in delivering essential online services to their patients.

Doctor & Clinic Services

Visit Clinic offers a variety of specialized online forms tailored for doctors and clinics, facilitating the execution of daily operations through the portal. This portal provides an array of services, segmented into two main categories: services for doctors and services for clinics. The key to enhancing professional collaboration lies in the seamless integration of these services with patient care and other portal functionalities, ensuring a cohesive and efficient healthcare experience.

Laboratory Services

Ensure the provision of essential services for the functioning of a medical laboratory.

Laboratory Services

A Laboratory Information Management System (LIMS) is an online software solution designed to enhance the efficiency of laboratories that handle a high volume of samples for clinical research. By visiting our clinic, you can access a suite of standard laboratory functionalities, ensuring your lab remains at the forefront with optimal configurations, streamlined reception forms, and specialized staff. Our platform empowers laboratory professionals to execute their daily tasks with utmost proficiency and style.

Pharmacy Services

Pharmacy services are offered through both online platforms and in-person facilities.

Pharmacy Services

Pharmacy involves a multifaceted approach to the formulation, distribution, and regulation of pharmaceutical medications. The visit clinic offers two distinct pharmacy services. The first is an online platform accessible through the website, which is integrated with a desktop application serving as a sales point. This setup ensures real-time synchronization, maintaining the pharmacy's modules up-to-date with the online portal. The second service operates entirely offline, enabling pharmacists to deliver services autonomously, without the need for an internet connection or recurring subscription fees.

Pharmacy Services

Customer Purchase Requests				
	Locate a public record of a user's medication order	Image Tracking Prescription	Monitor the status of a medicine order for public users	Locate Patient Clinic Prescription

Medicine Library Services

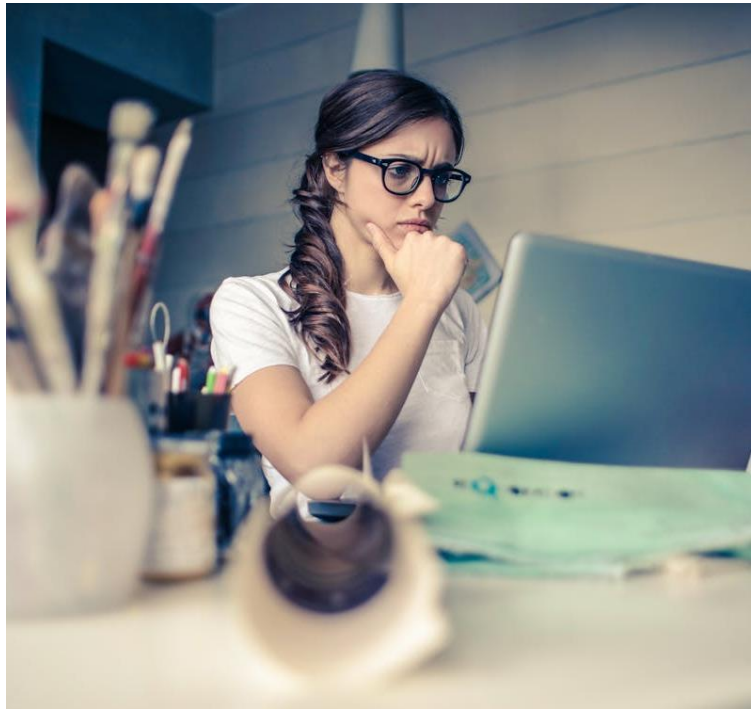
The medical library, featuring a curated selection of pharmaceutical products from various nations, serves as a valuable resource for healthcare professionals and researchers.

Medicine Library Services

The Medicine Library serves as an extensive repository, featuring a collection of over 198,000 medicinal products from numerous pharmaceutical manufacturers across ten countries globally. This platform is accessible to doctors, pharmacists, and medical institutions, enabling them to peruse a wide range of medicinal offerings. Additionally, the library facilitates research by providing access to a wealth of existing information sources on medications, including seamless integration with the Google search engine and the publicly available resources of Wikipedia, enriching users' knowledge about various medicinal products.

Medicine Library Services

Medicine Library				
	Searching for Medical Library Resources	Locate and incorporate new pharmaceuticals into my account directory	Promptly incorporate medication into the clinic or pharmacy inventory	Corporate Pharmaceutical Inventory
	Medicine Classification	Request for Inclusion of a New Medication	Medication Requisition Form	



Project Management Services

The project management module is designed to streamline the fundamental requirements for initiating, tracking, and completing a project.

Project Management Services

Project management involves the strategic application of knowledge, skills, and various tools and techniques to execute a set of tasks, aiming to fulfill predetermined objectives within given constraints. Visit Clinic equips project management professionals with the essential resources required to devise, implement, and manage plans collaboratively with teams and stakeholders, ensuring the achievement of targeted objectives.

Factory Product Catalogue Services

The optimal management solution for healthcare institutions to oversee medical products.

Factory Product Catalogue Services

A factory product catalog is an extensive collection of specialized documents that display the diverse products a factory or medical company manufactures or supplies. It acts as an essential tool for potential clients, distributors, and retailers to review the products offered. Visit Clinic offers exceptional online services for managing factory product catalogs, aiding medical organizations in delivering detailed insights about medical products, whether they are medications or medical equipment. With 24 specialized forms dedicated to information services, these organizations can effectively communicate their offerings to the public, enhancing accessibility to detailed medical product information.

Event Management Services

An intuitive and user-friendly interface for event management.

Event Management Services

Event management encompasses the meticulous planning, organization, and implementation of events. This can range from small meetings to large-scale announcements of new medical products. Attending events or conferences for the launch of medical or non-medical products is a significant aspect of this process. Visit Clinic offers exceptional online services to various medical organizations, delivering comprehensive event information through well-crafted web forms and reports. These tools are designed to assist organizations in professionally promoting their services, ensuring a positive impact through clearly outlined forms and procedural steps.

IT Service Management Services

Optimize your IT department's management by implementing ITIL's best practice processes for superior efficiency and service quality.

IT Service Management Services

IT Service Management (ITSM) involves the systematic management of information technology services to fulfill the requirements of end-users and aid organizations in attaining their business objectives. This comprehensive discipline covers the entirety of processes and tasks necessary for the conception, development, provision, and maintenance of IT services. Visit Clinic offers four key processes that are extensively utilized across various organizational structures to conduct operations professionally. These processes are deemed crucial as they are integral to the daily operational routines of the organization.

Computer Store Services

Optimize your medical industry offerings by incorporating and selling your products through a computer shop known for its excellent practices.

Computer Store Services

A computer store is a retail space specifically tailored for the sale of computer hardware, software, components, and various related items, including peripherals such as printers, scanners, and networking devices. Visit Clinic sets the benchmark for theoretical excellence in managing a computer store through its portal. It facilitates medical professionals, pharmacists, and other affiliated medical entities in purchasing computing equipment directly from the platform. Additionally, it empowers registered specialized computer retailers to list, manage, and vend their merchandise effectively.

Human Resources Management Services

This platform is crafted to assist you in the effective management of your company's human and financial resources.

Human Resources Management Services

Human Resource Management (HRM) embodies a strategic and systematic method for managing an organization's workforce. It aims to optimize employee performance to meet the strategic goals of the employer. Visit Clinic offers a comprehensive suite of HR forms utilized by various organizations to streamline their operations. These include a range of activities such as managing the general ledger, overseeing financial years, tracking income and expenses, and providing automated HR forms. These tools assist employees in submitting data efficiently and support the overall management of organizational resources, among other advanced features.

Healthcare Equipment Management Services

The advent of online visit clinic portals for the presentation and sale of medical equipment has revolutionized the healthcare industry, offering myriad benefits to patients and medical specialists alike. These digital platforms serve as a nexus for innovation, efficiency, and accessibility in medical care. For patients, the primary advantage lies in the ease of obtaining vital information about medical devices that can significantly improve their quality of life. They can explore a range of products, from simple aids like blood pressure monitors to more complex apparatuses such as home dialysis machines, all from the comfort of their homes. This not only empowers them with choice but also with the knowledge to make informed decisions about their health management.
